Shock Absorber Guide

Sachs-Boge
Internals: Twin tube, hydraulic

Same shock fitted to the EV when new and
sold as a replacement by VW dealers.

Bilstein
Internals: Twin tube, low pressure gas

Low pressure gas, very similar ride characteristics as Sachs-Boge above.

Bilstein
Internals: Mono tube, high pressure gas

High pressure gas, firmer ride than the above, recommended for EVC (all four) and Rialta (front only). May also be used on all GL, GLS & MV models but, the ride will be more firm on the shorter, lighter vehicle.

Winnebago
Internals: Mono tube, high pressure gas

High pressure Bilstein gas for the rear of the Rialta only. This is the same shock sold by a Winnebago dealer.

Koni
Internals: Twin tube, hydraulic

This is the only shock available for the EV in which the level of rebound can be adjusted to your personal preference.

Some of the parts listed herein may not be applicable for the Winnebago Rialta.

Delivery on most items is two or three days, including Alaska and Hawaii. Next day delivery is also available. Please check our website or e-mail for info or clarification on any item shown on this list. Every attempt has been made to obtain parts from the original equipment manufacturer, known in the industry as OE or OEM. We sell genuine VW, OE/OEM and quality aftermarket parts at rock bottom prices. Your comments and suggestions are welcomed.

Thank you for your patronage.
